## UTILITY SERVICES

### POLE INSPECTION

Alamon works hand in hand with clients to provide cost effective inspection programs based on geographies/climate, pole species, budget, and state regulatory requirements.

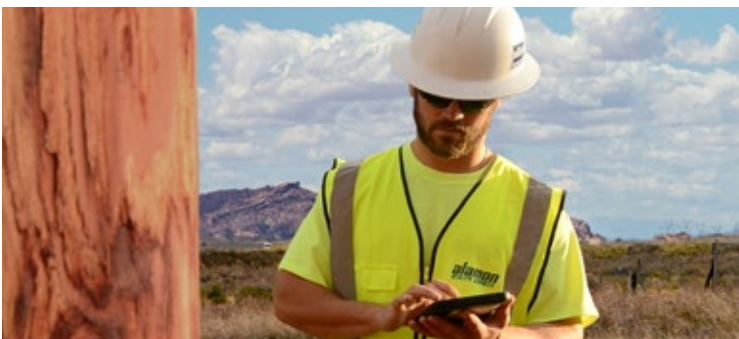

### REMEDIAL POLE TREATMENTS

Alamon's treatment programs are a 'booster' shot to your poles' original preservative treatments. A timely pole treatment program can extend the life of in-service poles beyond normal service ranges.

### POLE REINFORCEMENT

Alamon's Pole Reinforcement programs help Utilities restore poles to code mandated strength requirements at a fraction of the time and cost of pole replacements.

## Alamon Prioritizes Customer Satisfaction

Alamon views our work opportunities as long-term professional partnerships. This philosophy drives a 40+ year history of helping our clients manage and deliver successful, on-time deployments across all industries.

## Alamon is Employee Owned

Nobody cares more about doing the job right than an owner.

Alamon is made up of long-term, career-oriented team members vested in the success of every project that we're entrusted with. Our Employee Stock Ownership Plan drives a strong culture of accountability, safety and workmanship that are core strengths of our services.
